

# Practical Steps for Increasing Openness and Reproducibility: An Introduction to the OSF

There are many actions researchers can take to increase the openness and reproducibility of their work. Please join us for a free workshop, hosted by the [Center for Open Science](#), to learn easy, practical steps researchers can take to increase the reproducibility of their work. The workshop will be hands-on. Using example studies, attendees will actively participate in creating a reproducible project from start to finish.

## Information:

**Date:** Wednesday, November 1st, 2017

**Time:** 8:45am - 11:45am

**Location:** 1101 ASY

## Topics covered:

- Project documentation
- Version control
- Pre-Analysis plans
- Open source tools like the Center for Open Science's [Open Science Framework](#) to easily implement these concepts in a scientific workflow.

This workshop is aimed at graduate students, postdocs, and faculty across disciplines, who are engaged in empirical research. The workshop does not require any specialized knowledge of programming. Participants will gain a foundation for incorporating reproducible, transparent practices into their current workflows.

**Speaker:** TBD

**Attendees will need to bring their own laptop in order to fully participate.**

Please RSVP at <https://goo.gl/713eNX> as space is limited.
